Name of TA:

This test is to be taken without calculators and notes of any sorts. The allowed time is 50 minutes. Provide exact answers; not decimal approximations! For example, if you mean $\sqrt{2}$ do not write 1.414.... Show your work, otherwise credit cannot be given.

Write your name, your section number as well as the name of your TA on **EVERY PAGE** of this test. This is very important.

I: (25 points)

a) Find the 6-th order Taylor polynomial $P_6(x)$ for the function $\exp(x^3)$.

b) Using the above result, compute an approximate value for

$$\int_0^1 \frac{\exp(x^3) - 1 - x^3}{x^6} dx .$$

c) Give an estimate on how accurate the value computed in b) approximates the integral.
